| Short Description of the<br>Company | MoTA, Museum of Transitory Art, as name indicates, is an<br>unique platform dedicated to the research and production of<br>transitory, experimental and live art forms. MoTA is a<br>multidisciplinary platform dedicated to the research,<br>production and presentation of Transitory, Experimental and<br>Live Art forms. As its name indicates, MoTA examines the<br>ideas of museum - what is the role of the museum today and in |
|                                     | the future, transitoriness- in either space or time- and art-  |

|       | what is art in relation to life. MoTA is a museum without<br>physical space. Its programs are realised in different locations<br>and contexts, both in physical and virtual space. MoTA<br>organizes support actions for transitory art in the form of<br>continuous events, exhibitions and educational programs both<br>locally and internationally. MoTA's program is happening<br>throughout the year in cities across Europe and beyond. It is<br>conceived through an open and collaborative approach of<br>international curators and artists and is enriched with in depth<br>research of its yearly theme.   |
|-------|---|
| Other | MoTA's approach to artistic production is collaboration. With<br>its methodology MoTA aims at over-coming social differences<br>and exclusive modes of working. MoTA is an artistic-curatorial<br>initiative dealing with themes of contemporary system errors<br>and their consequences (such as virtuality, alienation, loss of<br>identity, hyper-mobility, sexual freedom, media and social<br>violence of all kinds) and strategies to produce ideas, actions<br>and reactions to these errors. MoTA measures contact with<br>public outside of artistic circles and discussion outside auto-<br>refelective philosophies of artworks. MoTA is in constant search<br>for the new, the uncertain and the undefined. MOTA is also the<br>first regular artist-in-residency program in Slovenia, with the<br>purpose to give a living and working environment to foreign<br>artists in Ljubljana. We understand our residency program as a<br>platform for dialogue and collaborative work. Working closely<br>with artists, researchers and curators, we aim to develop long-<br>term and sustainable collaborations and engage with projects<br>which mobilise art and other communities in order to produce<br>new thoughts, actions and directions. |
