Summer Masterclasses 2015

The main purpose of the summer masterclasses is to introduce the innovative teaching methods of our institution. Participating students, therefore, will have the unique opportunity to meet and work with our faculty before the beginning of the academic year. The courses will be held at our main building, the marvelous 16th Century ex-convent "S. Dominic" in Cefalù, Sicily.

The masterclasses have been organized in order to create a strong synergy between the different musical disciplines, while focusing on the interaction between teachers and students of the various courses. The professors have designed their educational activities so that they are complementary to each other, thus ensuring that students will have an effective and practical musical experience.

All faculty members are bilingual therefore lessons will be held in English and Italian.

All students will deepen their studies concentrating on the unique aspects of their studies while having various opportunities for practical insights. At the conclusion of the masterclass all participants will receive a certificate of attendance.

The final concerts will be held at the "S. Cicero" Municipal Theater of Cefalu and at the Church of San Domenico in Palermo.
