## Seminário (Tuesday) 10/10/2023, On-line, 14h30 Zoom address: https://videoconf-colibri.zoom.us/j/91482878119

## Polytopes and graded rings Balázs Szendröi University of Vienna, Austria

**Abstract.** I will give an introduction to Ehrhart theory, the theory of counting lattice points in polytopes, and its relation to algebraic geometry. I will explain some calculations done jointly with Praise Adeyemo, University of Ibadan, which connects hypercubes, the Segre embedding, graded and bigraded rings, and permutations.

**Acknowledgements:** This talk is partially supported by CIMA (Centro de Investigação em Matemática e Aplicações) through project UIDB/04674/2020 of FCT - Fundação para a Ciência e a Tecnologia, Portugal.
