Applications for Admission to the Master Program in
One Health – Human and Animal Public Health
Academic year 2020/2021

1. The program is promoted by:

Universidade de Évora - Escola de Ciências e Tecnologia
Universidade Nova de Lisboa

2. Study program in Consortium:

- a. **Type of Consortium:** National
- b. **Type of Consortium:** Diploma to be awarded jointly by all the partner institutions, under the terms of article 42 of Decree-Law no. 74/2006, dated March 24 in its current republication
- c. **Type of Agreement:** Rotative (administrative and financial management of the institution responsible for the edition)
- d. **Coordinator Institution:** Universidade de Évora
- e. **Partner Institutions:**
 - Universidade de Évora
 - Universidade Nova de Lisboa
- f. **Host Institution:** Universidade de Évora
 - **Applications:** Applications must be made online, through the Integrated Information System of the University of Évora (SIIUE), within the deadlines set in the Access and Entry Applications Calendar. University of Évora in 2020/21

g. **Executive Program Committee:**

Departamento de Medicina Veterinária
Universidade de Évora
Prof. Manuela Vilhena (mmcv@uevora.pt)
Prof. António Mira (amira@uevora.pt)
Faculdade de Ciências Médicas
NOVA Medical School
Prof. Luís Almeida Nunes (luis.nunes@chlc.min-saude.pt)
Prof. Ana Glória Fonseca (ana.fonseca@nms.unl.pt)

3. Program description:

The MSc in One Health aims to reinforce the professional and academic skills of proponents with diverse backgrounds, whose actions directly or indirectly impact Public Health.

One Health is a work methodology that aims to implement measures capable of promoting collaboration between different sectors and thus promoting the health of all of us and those around us (public health). The concept of One Health is not new, and the practice of many professionals linked to human and animal health mirrored the concept, all over the world.

The trend towards clinical specialization has caused the loss of focus on the different connections that exist between human and animal populations and the influence of the environment on health.

Currently, mobility of people, animals and goods is a tangle of routes, distances, cultures and diverse methods of plant and animal production, which makes the pattern of transmission of pathogens increasingly complex, constituting one of the greatest challenges of today's world.

The solution of having teams of clinicians waiting for calamitous situations to occur is increasingly expensive and unviable. The solution is to prevent such a situation from occurring and this is only possible, knowing, unveiling and interpreting the different signals that can help predict such event hence interrupting the chain of transmission of the unwanted occurrence.

The United Nations (UN), through its different bodies, has already adopted this work methodology. However, training in the area is still scarce.

4. Career opportunities:

At Local, Regional, National and International level:

- Organisms responsible for promoting and protecting wildlife
- Organisations responsible for the control of Zoonoses both in institutions linked to Human and Animal Health
- Organizations responsible for promoting Public Health
- Organisations dedicated to the development of Health Policies
- Organisms linked to the Environment and climate change
- Institutional Bodies linked to Global Trade / Food Security
- Organisms linked to Urbanism and Sanitation
- Research
- Academic teaching career

5. Number of registration at DGES:

R/A-Cr 79/2019

6. Number of accreditation process by A3ES:

NCE/18/0000064

7. Program Creation Norm:

Diário da República

8. General conditions of access and admission:

i Legal conditions for access to the cycle of studies leading to the master degree

The following individuals can apply for a cycle of studies leading to the master degree:

- holders of a Portuguese Licenciado degree or legal equivalent;
- holders of a foreign higher education undergraduate degree, which is recognized as satisfying the objectives of the degree of Licenciado by the competent scientific committee of the higher education institution where they wish to be admitted;
- holders of an academic, scientific or professional curriculum which is recognized as attesting the ability to carry out this cycle of studies by the competent scientific committee of the higher education institution where they wish to be admitted.

ii Specific admission conditions

- Holders of a Bachelor's degree or legal equivalent in the health field or related to it, namely medicine, veterinary, sociology, nursing, biology, sanitation engineering and other related areas.
- Holders of a foreign higher academic degree, in the areas mentioned above, conferred following a first cycle of studies, organized according to the principles of the Bologna Process by a State adhering to this process
- Holders of an academic, scientific or professional curriculum, which is recognized by the Scientific Council of the Host Institution, as attesting the capacity to carry out this cycle of studies.

9. Selection Process:

- Academic qualifications: 40%
 - Qualifications area: 30%
 - Level of qualifications: 50%
 - Highest qualification average: 20%
- Curriculum analysis: 40%
 - Professional experience in the area or related areas: 40%
 - Training in transversal competences: 20%
 - Professional training in the area of the course or similar: 20%
 - teaching in the course area: 10%
 - Participation in research projects and activities in the area: 10%
- Interview: 20%
 - Motivation and commitment: 100%

Observations regarding the selection process:

Preferentially will be admitted candidates with current responsibilities in health, human, animal or environmental surveillance and communication

10. Maximum number of admissions

- Maximum number for admission: 20

11. Minimum number of students: 12

12. Tuition fee

- Tuition fee: 2500.00 €

13. Organization / duration:

- Duration of the program:** 4 semesters
- Number of ECTS to obtain the degree:** 120
- Number of ECTS to obtain the master's course (conclusion of the curricular part):**
60

14. Language (s) of teaching:

- Portuguese

15. Learning Type: Presential

16. Schedule type: Post-labor hours

17. Classes schedule (week days and schedule)

Fridays and Saturdays

18. Program starting date: September of 2020

February 10, 2020
The Rector

Ana Costa Freitas
